PRODUCT OVERVIEW

Ecological Wood Fibre Insulation for New and Refurbished Buildings – From Roof to Cellar Ceiling

GUTEX ecological insulation products are the ideal choice for a host of applications, including external thermal insulation composite systems, wall insulation for vented facades (rainscreens), insulation above rafters and/or between frame members with rain-tight sheathing, insulation of ceilings, interior insulation of exterior walls, insulation of service cavities, acoustic underlay in various floor assemblies and under many floor coverings. We source the raw material for our manufactured products from fir and spruce grown and harvested using solely sustainable forestry practices. The products conform to the highest quality standards and their KEYMARK certification mark confirms their compliance with all applicable EU standards.

GUTEX Multiplex-top
Certified rain-tight sarking board.

GUTEX Ultratherm
Unique rain-tight sarking board with patented tongue and groove interlocking system and an excellent U-factor.

GUTEX Multitherm
Moisture-resistant insulation board for rainscreen applications, supplemental above-rafter roof sarking or under-rafter insulation.

GUTEX Thermosafe-homogen
Universal wood fibre insulation board with excellent insulation properties for roofs and exterior walls.

GUTEX Thermofibre
Wood fibre blow-in insulation for enclosed cavities or as loose fill in unenclosed horizontal spaces.

GUTEX Thermoflex
Flexible wood fibre batt for use between rafters and cavities.

GUTEX Thermoflat
Compression-resistant wood fibre insulation board for flat roofs with wood, concrete or sheet metal construction.

GUTEX Thermoinstal
Compression-resistant insulation for service cavities.

GUTEX Thermoroom
Wood fibre insulation board for the interior insulation of exterior walls.

GUTEX Thermosafe-wd
Compression-resistant insulation for interior floors and walls.

GUTEX Thermosafe-nf
Impact insulation board with spruce joint strips for screw-fastened solid wood floor planking and short plank wood flooring.

GUTEX Thermofloor
Impact insulation board for all floor assemblies.

GUTEX Happy Step
Underlay softens the impact of footfall for more pleasant walking and quieter floors, such as wood planking.

GUTEX Thermowall/-gf /NF
Plasterboard for the ecological Thermowall ETICS.

GUTEX Thermowall-L
Lighter plasterboard delivers superb insulation with the ecological Thermowall ETICS. Particularly ideal for installation over uninterrupted masonry or wood substrates.

GUTEX Thermowall Durio
Specifically designed board for use in Durio facade systems finished in render and timber rainscreens.

NOTE

You'll find more information about properly using our insulation products at:

 www.gutex.de

APPLICATIONS AND SOLUTIONS

Roofs

- › **✓ Tecadio GUTEX roof refurbishment system**
- › Above-rafter insulation
- › Sarking boards
- › Flat roof insulation
- › Cavity insulation (GUTEX Thermoflex batts)
- › Cavity insulation (GUTEX Thermofibre blow-in insulation)

Interior

- › **✓ Intevio GUTEX interior insulation system**
- › Vapour permeable underlay installed from interior between rafters
- › Rafter underside insulation boards
- › Insulation under screed (dry / wet)
- › Top storey ceiling
- › Suspended ceiling
- › Solid wood flooring / Solid wood plank flooring
- › Service cavity insulation course
- › Partition walls
- › Cavity insulation (GUTEX Thermoflex batts)
- › Cavity insulation (GUTEX Thermofibre blow-in insulation)

Exterior Walls

- › **✓ Thermowall ETICS external thermal insulation composite system**
- › Render
- › Rainscreen
- › Brick facing
- › **✓ Durio system for unique facade design**
- › **✓ Implio window integration system**
- › Cavity insulation (GUTEX Thermoflex batts)
- › Cavity insulation (GUTEX Thermofibre blow-in insulation)

ROOFS

Protection against heat, cold and dependable resistance against rain

With GUTEX insulation products, your house or building stands secure against the elements. Our sarking boards are not just rain-tight, but as per TÜV Rheinland, they're hail-safe. And our insulation products deliver dependable protection against cold and excellent insulation against heat thanks to their lower thermal conductivity and greater volumetric thermal capacity. Significant diffusion openness, moisture absorption and release capacities ensure built structures and materials remain sound and healthy. High compression resistance and superb bend (flexural) strength mean the insulation products are stronger and more resistant to impact, making them more durable in the hands of contractors. Moreover, the durability and consistent dimensional trueness speed up their installation. Nail tape or strip sealant products are not required to seal temporarily exposed roofs. Such roofs remain weatherproof for up to twelve weeks.

GUTEX Multiplex-top

GUTEX Ultratherm

GUTEX Thermofibre

ADVANTAGES

- › Sarking and sheathing boards with patented tongue and groove joints deliver dependable protection against rain and superb durability
- › TÜV-certified hail protection (Hagelschutzklasse HW5)
- › Cross-brand cooperation between system designers, e.g. manufacturers of membranes, vapour barriers and adhesives
- › Seminars for system knowledge transfer

Systems and Products

- ›  **Tecadio GUTEX roof refurbishment system**
- › GUTEX Ultratherm rain-tight sarking board
- › GUTEX Multiplex-top rain-tight sarking board
- › GUTEX Thermosafe-homogen universal insulating board with homogenous cross-section
- › GUTEX Multitherm moisture-resistant insulation board
- › GUTEX Thermoflex flexible wood fibre insulation batt
- › GUTEX Thermofibre blow-in insulation

WALLS

Energy efficiency, comfort, wholesome living

Building with GUTEX systems and products to insulate exterior walls allows you to build compliant with energy efficiency standards, such as those stipulated by the KfW ("Effizienzhaus") in Germany, that may qualify you for rebates, preferred mortgage rates, etc. In addition, you have the assurance that your home will be comfortable and healthy. GUTEX Thermowall is the ETICS product for wood and masonry structures, while Durio provides you with the greatest design freedom. Implio gives you the assurance that your windows integrate tightly and effectively in your building's ETICS. And you may like to know that our wood fibre insulation boards are highly suitable in rainscreens installed on masonry, solid wood or timber-framed structures.

ADVANTAGES

- › Thermowall ETICS' certification offers you the freedom of choosing render systems from different manufacturers
- › ETICS installs directly to timber framing
- › Very diffusion-open insulation, which provides long-lasting integrity and performance
- › Cross-brand cooperation between system partners, e.g. manufacturers of render
- › Greater transparency and dependability in planning and installation thanks to the available 340 certified wood construction designs

Systems and Products

- › **Thermowall ETICS**
external thermal insulation composite system
- › **Durio system for unique facade design**
- › **Implio window integration system**
- › GUTEX Multitherm moisture-resistant insulation board
- › GUTEX Thermoflex flexible wood fibre insulation batt
- › GUTEX Thermofibre blow-in Insulation

🏠 INTERIOR

Improved thermal insulation, effective acoustic insulation and comfortable living spaces

Intevio interior insulation system installs easily and quickly, and provides dependable protection against mould and mildew. Thanks to lower costs and higher energy savings, the expense of refurbishment quickly pays for itself with this system. GUTEX insulation floorboards are suitable for use over concrete and in wooden joist ceiling constructions, as well as a host of different assemblies, delivering very good acoustic insulation, for example, under wet screed, mastic asphalt, particle or chipboard, OSB substrate floorboards, dry screed, engineered wood flooring, laminate flooring and solid wood planking. Application-specific solutions are also available for service cavities and light-weight partition walls.

ADVANTAGES

- › Moisture-resistant interior insulation
- › Highly effective insulation against impact and airborne noise
- › Many available certified and quantified acoustic insulation assemblies
- › Floor insulation with excellent impact resistance and good thermal conductivity performance

Systems and Products

- › **Intevio GUTEX interior insulation system**
- › GUTEX Thermosafe-homogen universal insulating board with homogenous cross-section
- › GUTEX Thermosafe-nf
- › GUTEX Thermosafe-wd compression-resistant insulation for interior floors and walls
- › GUTEX Happy Step, a universal underlay for high-quality interior floor coverings
- › GUTEX Thermoroom, specially designed to insulate interior sides of outer walls
- › GUTEX Thermoflex flexible wood fibre insulation batt
- › GUTEX Thermofibre blow-in insulation
- › GUTEX Thermoinstal compression-resistant insulation for service cavities
- › GUTEX Thermofloor versatile impact insulation board

Product	GUTEX Thermowall-L ⁴⁾					GUTEX Thermowall Durio
Joint Type	Butt					Nut und Feder
	DIN EN 13171					DIN EN 13171
Thickness (mm)	120	140	160	180	200	70
Length x width (mm)	1250 x 590					1800 x 600
Weight per sheet (kg)	9.70	11.40	13.00	14.60	16.20	12.10
Weight per m ² (kg)	13.20	15.40	17.60	19.80	22.00	11.20
Boards per pallet	36	32	28	24	22	32
Square metres per pallet (m ²)	26.55	23.6	20.65	17.7	16.22	34.56
Actual coverage, length x width (mm)						1780 x 580
Square metres per sheet (m ²)	0.73					1.08
Weight per pallet (kg)	390					380
Density (kg/m ³)	~ 110					~ 160
Nominal thermal resistivity R _D (m ² K/W)	3.15	3.65	4.2	4.7	5.25	1.75
sd-value (m)	0.36	0.42	0.48	0.54	0.60	0.28
Vapour diffusion factor μ	3					4
Specific heat capacity (J/kgK)	2100					2100
Nominal thermal conductivity λ _D (W/mK)	0.038					0.040
Compressive stress/strength (kPa)	≥ 50					≥ 100
Tensile strength perpendicular to board surface (kPa)	≥ 7.5					≥ 10
Short-term water absorption (kg/m ²)	≤ 1.0					≤ 1.0
Dynamic stiffness (MN/m ³)						
Compressibility (mm)						
Air flow resistivity (kPa·s/m ²)	≥ 100					≥ 100
Fire reaction ¹⁾	E					E

Legend is on page 19; * Product is not currently available. Please contact us for alternative options.

- › The thermal resistivity is based on $\lambda_{90/90}$ and board thickness
- › GUTEX Multiplex-top and GUTEX Ultratherm: Guaranteed by Germany's Association of Roofers
- › GUTEX will be glad to send you test reports

¹⁾ Euro class as per DIN EN 13501-1

²⁾ Other dimensions available by request

³⁾ Suitable for REI 90 compliance-tested structures.

⁴⁾ Certification pending

⁵⁾ Custom sizes are available; consult factory or sales agent
Non-smouldering PB-Hoch-180895 as per EN 16733

GUTEX ADVANTAGES

Pleasant indoor climate

Ideal acoustic insulation

Insulation in summer

Insulation in winter

Systems deliver greater dependability

Sustainability

Service

Certified quality

All GUTEX products are manufactured from fir and spruce obtained solely from the Black Forest using sustainable forestry practices – truly the best basis for high quality wood fibre insulation. In addition, the natureplus® certificate indicates the product is biologically safe and manufactured using environmentally safe techniques and practices. It also verifies its suitability and usability for the specified applications.

OUR PRODUCT AND SERVICE DESIGNATIONS
